The following is an examiner's statement of reasons for allowance:

Great Britain Patent No. 1,295,777 (hereinafter referred to as GB '777) is considered the closest prior art to the claimed invention. GB '777 teaches tubular filters having a transverse inlet pipe (11) communicating with the filter chamber (17) containing the filter units and is provided with a baffle or diversion member (20) within the casing to more evenly distribute the fluid to be filtered throughout the chamber (17) and around the filter units. However, GB '777 does neither teach nor suggest the filters when viewed in transverse direction of the filter cartridge and at the level of the inlet, the shortest distance (X) from the filter cartridge to the side wall is, viewed in the transverse direction of the filter cartridge and below or above the level of the inlet, greater than the shortest distance (Y) from the filter cartridge to the side wall to take advantage of making the filter housing of compact construction or, in particular in the case of existing filter cartridge, to increase the filter capacity and/or to improve the filtration unit (see claims 24, 44-45; figures 2, 5; pages 1-2 of the specification).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
